

Kinesio Tape Courses Presents: KINESIO TAPING ADVANCED TECHNIQUES AND CLINICAL REASONING

Ann Arbor Michigan November 18, 2017

INSTRUCTOR: Lori Robinson, OTR/L, CKTI

Lori received her degree in Occupational Therapy from Eastern Kentucky University. She has worked in a variety of settings including acute, subacute, comprehensive inpatient rehabilitation, outpatient hand therapy, and home health with orthopedic and neurologically involved patients. Since she began working with the Kinesio Taping Method, Lori has used it with a wide range of patients including those with total joint replacements, high/low tone from CVA or TBI, edema problems and multiple hand injuries/conditions. Lori developed and completed a research study on Kinesio Taping for TKR, and presented the results at the International Kinesio Taping Symposium in Tokyo, Japan in March 2004. Lori currently works at Fidelity Health Care. She enjoys being creative and finding new ways to use Kinesio Taping to benefit any patient population. Lori became a Certified Kinesio Taping Instructor in 1999 and was awarded the Certified Kinesio Taping Instructor of the Year in 2011. Lori recently attended the 2012 Olympics to represent the Kinesio Taping Association. While in London, she promoted Kinesio Taping to the US Olympic Medical Staff.

Location: Ann Arbor Michigan

DATE: Saturday November 18, 2017
